

Our Boarding Facility

Dog Boarding

For dogs, we have 14 inside runs, 9 outdoor covered runs and a fenced in play area. Dogs that stay with us are boarded in one of our indoor runs. Once daily, your dog will be let out to one of our outdoor

Daily Romping in Our Play Yard

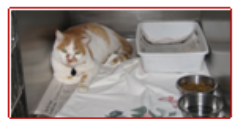

runs while his or her main run is cleaned and disinfected. Twice daily your pet is taken outside, weather permitting, to our play yard. He or she is allowed to romp and enjoy the outdoors. Our

kennel staff observes them the entire time to

ensure there are no escape artists and to monitor their..., well..., bodily functions. If your dog has a favorite toy to play with outside, feel free to bring it, and let the staff know you want them to play with your pet.

Cat Boarding

Our boarding cats are kept in cages in a cozy laundry room, much like they might have at home. They are observed and talked to often, as the kennel staff is frequently in and out of that room washing and folding laundry. Unfortunately, due to their escape artist nature, our boarding cats are not allowed free roam outside their cages. Their litter box is cleaned as soon as it is soiled and noticed. Their cage is cleaned and disinfected daily. It is not unusual to find one of the kennel staff taking a laundry break by cuddling one of the cats.

A Day In The Life....

Here is a typical schedule for your pet at our boarding facility.

Monday through Friday:

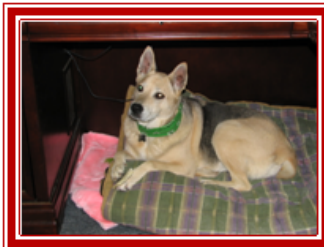

8:00 AM the staff arrives, all animals are briefly surveyed and morning medications are given. Any problems noticed by the kennel staff are brought to the attention of the hospital staff, who then would contact you.

8:15-11:00 AM Dogs are briefly taken outside to the play yard to relieve themselves, kennels and cat cages are cleaned and animals are fed.

10:00 AM to 1:00 PM your dog is taken outside to the play yard to romp for awhile. Dogs are taken one at a time, unless they have "brothers or sisters" that you want them to play with.

3:30-4:00 PM your dogs are taken outside for a second romp in the play yard

By 5:00 PM dinner is being served for both cats and dogs. Evening treatments are done between 5:00PM and 6:00 PM. The kennel staff leaves the hospital around 6:00 PM.

Saturday's schedule is identical to a weekday except slightly compressed. The Kennel staff is here from 8:30 AM-4:30 PM

Sunday and Holidays: Although the hospital is closed on these days, the boarding facility is run like any week day. There is a veterinary technician on call for any problems that may occur.

We are closed for drop-off and pickup on the 6 major holidays as well as Friday after Thanksgiving and the day after Christmas. If you would like a Sunday pickup you must prearrange it. Sunday pickups are between 8:00am and 8:15 am.

We are not a 24 hour facility and your pet will be alone during the night.

When dropping off your pet for boarding try to arrive before 5:00 PM (before 3:00 PM on Sat.) so that your furry family member can get settled in before we go home for the night. Please allow 20 minutes to check in your pet.

We strive to meet all of your pet's needs and make their boarding experience as much like home as possible.

Boarding Rates

Cats \$16.50/day

Dogs weighing up to 25 lbs \$23.00/day

Dogs weighing over 25lbs \$25.00/day

Additional fee for medications

Vaccines and Disease Control

Disease control is paramount in our boarding facility. Because we are a veterinary hospital we are particularly equipped and knowledgeable about your pet's health. For your pet's health we require current vaccines against the common communicable diseases on all of our boarders. If you have your vaccines done other than at our clinic please be prepared to show us vaccine records or provide us with the hospital name that vaccinates your pet. We also require treatment for external parasites (mainly fleas) if we see that your pet needs this.

Our Medical Boarding

As a veterinary hospital we are committed to the health of your pet. Integrating our hospital with our boarding facility puts us in a unique position to care for your pet, especially if he or she has medical needs. We will administer medications and monitor treatment progress as required for your dog or cat's health condition. Our staff veterinarians can make decisions and recommendations, if need be, while your pet is boarding with us. We are also able to spot new problems that might occur during their stay and call you with recommendations.

Communication

It is our goal to communicate clearly with each client. Consequently, allow 15-30 minutes to check in your dog or cat for boarding, especially if you are new to us or your pet has special needs or instructions. Feel free to bring your pet's food, feeding instructions, toys, blankets, etc. We only ask that you label each item so we know who it belongs to when we launder it. We also warn you that some of your bedding may go home soiled if we haven't had time to launder it the day you pick up your pet. We will ask you for an emergency phone number where we can reach you or, if you are unavailable, a person that can make decisions for your pet. If you want updates on your animal's well being feel free to call us anytime during your animal's stay.

Grooming While Boarding

We offer bathing services by our kennel staff if you like so your pet is sent home clean and sweet smelling. If you board your pet for 7 days or more the bath is complimentary, otherwise it only costs \$20-\$24 depending on size. We also offer professional grooming on Monday, Wednesday, and Friday by Janice Wagg. Just let our staff know and we can schedule Janice to groom your pet before you pick them up.
